

1st April 2008

To Whom It May Concern,

Wind Farm Civils Ltd. was contracted to undertake the first phase of the civil works programme at Drumlough Hill Windfarm Extension, Co. Donegal. The works consisted of c. 2km of site roads (including floating road), drainage and associated elements.

The works were carried out to a very satisfactory standard, in a professional and safe manner and were completed on time to a tight works schedule.

We would have no hesitation in considering Wind Farm Civils Ltd. for further civil construction works of this type and would have pleasure in recommending the company to other parties seeking to have such works carried out on their behalf.

Yours sincerely,

Aidan Sweeney
Managing Director
