Re: Wind Farm Civils Ltd. Testimonial

To Whom It May Concern

"Wind Farm Civils Ltd." completed Civil Works on one of our Irish wind farm projects between February & May 2006, at Kilvinane, Dunmanway, County Cork. This involved the construction of 3no. large concrete foundations for our G80 & G58 wind turbines. In addition, they built a 20kv sub-station building.

We were very happy with the standard of their workmanship, and the professionalism they displayed throughout the contract period. In particular, in their flexibility in dealing various changes to "Can" delivery dates.

Having enjoyed a successful working relationship with "Wind Farm Civils" at Kilvinane, we are now inviting them to price Civil Works on other European wind farm projects, with the view of working together closely again.

We would highly recommend this Company to any other third party interested in completing Civil Works on their particular wind farm project.

Yours faithfully

Jose Felix GONZALEZ
