**18<sup>th</sup> December 2007**

**Ref: Wind Farm Civils**

To whom it may concern

Wind Farm Civils were contracted to undertake the civil works at Mountainlodge Windfarm. The works consisted of 23 wind turbine foundation bases for GE 1.5 wind turbine generators.

The contract was managed in a competent and professional manner and the works were delivered on time and to a very satisfactory quality.

We would have no hesitation in providing Wind Farm Civils with the opportunity to tender for other wind farm construction work and would recommend the company to other parties seeking to undertake civil works for these type of projects.

Yours Faithfully,

A handwritten signature in purple ink, appearing to read 'Harry Harbison'.
